

PINSSAR

World class projects can be risky business

When it comes to risks associated with diesel emissions, Pinssar is the only practical solution for managing your diesel emissions strategy.

Pinssar has developed an award winning solution which reliably monitors diesel emissions and provides continuous real-time air quality data.

“This globally recognised system delivers consistent insights to enable you to manage risks associated with diesel emissions in your underground environments.”

Protecting People

Diesel emissions are a significant risk to people. Exposure to high concentrations can have safety ramifications and long-term exposure can lead to severe health issues, such as cancer in the lungs and primary organs.

Pinssar offers the only practical solution for managing your diesel emissions strategy to reduce exposure to a deadly Group 1 carcinogen.

The data provided from the Pinssar system can also:

- Help support the goal of zero harm.
- Provide data to help reduce diesel emissions exposure not only to the workforce, but also to the local community.
- Create certainty around emission data to support social licence and community acceptance.
- Demonstrate the importance the company places on employee health and safety.
- Ensure a healthy workplace, enabling you to be an employer of first choice for skilled workers.

Protecting the Financials

Left unmanaged, diesel emissions have the potential to pose significant financial threats.

Pinssar's diesel emission monitoring system is recognised globally for providing valuable air-quality data and healthier work environments so that you can focus on progressing your project.

The data provided from the Pinssar system can be used to:

- Defend false claims or litigation resulting in shutdowns due to unsubstantiated diesel exceedance concerns.
- Reduce or eliminate potential legal and financial penalties associated with non-compliance to the BS 6164 Code of Practice.
- Streamline operational costs by linking your controls with data-driven decisions.
- Reduce disruptions to the progress of your project. A healthy workforce is an efficient workforce.

Pinssar offers the only proven technology which meets the recommendations of the British Standard 6164 Code of Practice.

Protecting your Reputation

Diesel emissions can have a severe impact on the reputation of the project.

Protect your reputation by putting health at the top of your agenda. Our globally recognised monitoring system provides data-driven insights for future-safe decision making and healthier work environments.

The insights provided from the Pinssar system can be used to:

- Comply with industry standard BS 6164 Code of Practice.
- Provide certainty around emission data to support social licence and positive publicity.
- Increase the likelihood of completing the project on time and on budget.
- Protect your community and be recognised for building a healthier project.

When it comes to your project's diesel emissions monitoring strategy, will you...

- ✓ **Protect your People**
- ✓ **Protect your Financials**
- ✓ **Protect your Reputation**
- ✓ **Prescribe Pinssar in your tender**
- ✓ **Ensure contractors comply**
- ✓ **Request further information**

**Don't risk your project.
Measure your diesel emissions 24/7.**
